# AEROGREEN® 4220 WOOD CLEANER

AEROGREEN 4220 RTU (Ready to Use) Wood Cleaner is a safe cleaning product for wood surfaces that gently and effectively removes dust, dirt and grime. Just spray, mop or use a clean, dry cloth. AEROGREEN 4220 RTU dries fast without leaving a dulling residue behind and requires no rinsing. AEROGREEN 4220 RTU is safe for all hardwood, laminate, unwaxed and polyurethane finished wood floors and surfaces.

## CLEANING

**Hardwood Floors:** Dirt and grime can't hide on hardwood floors like they can on carpet, thus cleaning hardwood floors is essential to protecting and maintaining their beauty.

**Kitchen Cabinets:** Improper methods and products are sometimes used to clean wood kitchen cabinets. Avoid harsh chemicals that can damage the wood or dull the finish, and do not use oil soaps, silicone or acrylics, as they can leave a residue and adversely affect the adhesion of a finish coat in the future.

**Wood Furniture:** Polish can build up on wood furniture over time. Using a water soluble cleaning product with no soapy residue will extend the life of the furniture.

- Use AEROGREEN 4220 RTU, a non-toxic, low-VOC waterborne formula to clean your wood surfaces without leaving film or residue behind.
- Use AEROGREEN 4220 RTU Wood Surface Cleaner for all wood floors, cabinetry and furniture, as well as other wood surfaces.

### ADDITIONAL BENEFITS INCLUDE:

- Leaves no residue
- Low VOCs
- Non-hazardous/non-combustible
- No special hazardous training needed
- No rinsing required
- Can ship by air

### SPECIFICATIONS:

- Biodegradable - Yes
- Flammable combustible - No
- SCAQMD certified - Yes
- Contains terpenes - No
- Caustics - No
- pH - 8.5-9.0
- Density: lbs./gal. - 8.9
- Ready to use - Yes

## DIRECTIONS FOR USE ON WOOD SURFACES:

**DUST/SWEEP:** Dust your surface with a microfiber mop or cloth - it's the best daily defense against scratches and surface damage. Microfiber cleaning pads often use static electricity to trap dirt, particles and other household allergens.

When prepping wood floors, avoid lifting your microfiber mop off the floor when you clean. This way, you keep the dirt trapped on the pad. A broom can be effective as well, as long as the dirt is thoroughly collected off the ground.

**VACUUM:** Vacuums and wet mops are ideal for removing dirt from hard-to-reach areas, such as corners and spaces between hardwood paneling, and are great for weekly maintenance. However, practice caution when using vacuums and wet mops to clean your floors. If your vacuum has a beater bar, make sure it doesn't hit the bare floor. Also, be sure the wheels on the vacuum will not damage the floor.

**CLEAN:** Spray AEROGREEN 4220 RTU Wood Cleaner onto the surface and use a clean, dry cloth to wipe dry. The product will not leave a residue. Maintenance cleaning will help maintain the beauty of the wood surface.

**POLISH:** Polishing your wood surfaces every few months is a great way to maintain its beauty, as polishing renews and refreshes the finish that protects the surface.

Polishing your floor fills in microscopic scratches and evens out a floor's protective surface. When cleaning your floors, the finish is what gets the most attention, not the actual hardwood, which is why polishing is so important.

**SAFETY/CAUTION:** Rubber gloves are recommended to prevent drying of the skin. Avoid getting the cleaner into your eyes - goggles are recommended to protect eyes from unexpected splashing. If contact occurs, flush with running water. If irritation persists, seek medical attention. May cause dryness of the skin with prolonged use and is harmful if swallowed.

### AEROGREEN 4220 RTU WOOD CLEANER

SMIS NUMBER	PART NUMBER	SIZE
1017-63241	000422014	32 oz.
1017-63258	000422016	1 gallon
1017-63266	000422020	5 gallon
