

# AEROGREEN AVIATION PRODUCTS

*For Successful Runway Maintenance*

## **RUNWAY RUBBER BUILD-UP**

Carbonized rubber deposits on airport runways cause dangerous loss of marking visibility and surface friction, making the touchdown zone slippery and hazardous, endangering the lives of pilots, passengers, and the ground crew. Removing the rubber is the only way to guarantee that your

airport runways are safe. AEROGREEN 4035 Runway Rubber Remover Solution has been designed for use alone with airport sweepers and in combination with lower-pressure water-blasting equipment to effectively and safely remove the rubber build up.

## COMBINATION LOW-PRESSURE WATER:

AEROGREEN 4035 in combination with low pressure water-blasting equipment is the most effective, fastest, and safest process to remove rubber deposits while delivering better friction results than any other stand-alone rubber removal process. Using AEROGREEN with lower pressure prevents damage to the pavement and lighting system and is ideal for aging runway surfaces thus extending the life of the runway.

### **Aerogreen 4035 Runway Rubber Remover**

Size	Stock Number
5-gallon	AGS4035-P
55-gallon	ACS4035-D
275-gallon	AGS4035-T275
330-Gallon	AGS4035-T330

## AIRPORT SWEEPERS-BROOMS:

Using AEROGREEN 4035 with airport sweepers provides a safe product for airport personnel to use as a stand-alone process with sweepers-brooms or between regularly scheduled contractor services to keep rubber down and restore frictions to the runway surfaces.

### Aerogreen 4035 Runway Rubber Remover

Size	Stock Number
5-gallon	AGS4035-P
55-gallon	ACS4035-D
275-gallon	AGS4035-T275
330-Gallon	AGS4035-T330

## MOLD, MILDEW, ALGAE REMOVER:

Rid your airport of unsightly and dangerous mold, mildew and algae with AEROGREEN 4025 MOLD & MILDEW REMOVER to restore marking viability and restore friction.

### Aerogreen 4025 Mold, Mildew, and Algae Remover

Size	Stock Number
5-gallon	AGS4025-P
55-gallon	ACS4025-D
275-gallon	AGS4025-T275
330-Gallon	AGS4025-T330
